

PROGRAM-11

CODE:

```
import random
a=random.randint(0,10)
guess=int(input("Enter your guess(Between 0-10):"))
if(a==guess):
    print("Right Guess!")
else:
    print("Wrong Guess, Try Again! Right guess would have been",a)
```

OUTPUT:

```
Enter your guess(Between 0-10):5
Wrong Guess, Try Again! Right guess would have been 1
>>> |
```
