

# PROGRAM-7

## CODE:

```
arr=[]
n=int(input("Enter the number of students in the class:"))
print("Enter the grades:")
for i in range(3):
    a=[]
    for j in range(n):
        a.append(int(input()))
    arr.append(a)
print("Class grades in 3 subjects are:")
for i in range(3):
    print("Class grades in subject-",i+1,"are:")
    for j in range(n):
        print(arr[i][j], " ")
```

## OUTPUT:

```
Enter the number of students in the class:4
Enter the grades:
43
67
99
89
67
55
43
46
70
80
96
65
Class grades in 3 subjects are:
Class grades in subject- 1 are:
43
67
99
89
Class grades in subject- 2 are:
67
55
43
46
Class grades in subject- 3 are:
70
80
96
65
.
```
